

OPERATIONS:

Air is pulled at over 6 cubic feet per minute through organic vapor cartridges via an electric motor. The purified air travels through a flexible hose to the spray helmet. The lightweight fiberglass helmet (1.75 pounds) is polyurethane coated for durability, and has ample room for eyeglasses. It features an adjustable headband, a hinged visor, exhaust vents and a washable collar with drawstring.

T8 FEATURES:

The Kasco T8 operates from 6 volt battery (included) and has 4-hour running time. NIOSH 23-C approved. Ideal for both greenhouse and fieldwork. Includes 2-ZA2P3 filter cartridges, 6-volt battery, 110-volt battery charger, blower motor, belt, air-tube, and fiberglass helmet. (An optional second battery can be on the charger while the other is in use.)

Shipping Weight: 11 lbs
